- 2.- Arcilla expandida, actúa como drenaje. Evita el estancamiento, dosifica el transporte del agua y garantiza la aireación de las raíces.
- 3.- Tierra vegetal.

## INSTRUCCIONES DE PLANTADO

## RECOMMENDATIONS

After this period of adaption for the roots, fill the water tank until the top very slowly until the indicator reaches the maximum level. If there is no water, the indicator will be at the minimum level, check the indicator level regularly. The period of watering depends on the flowerpot size, plant type and its location. Consult it with a professional in the sector.

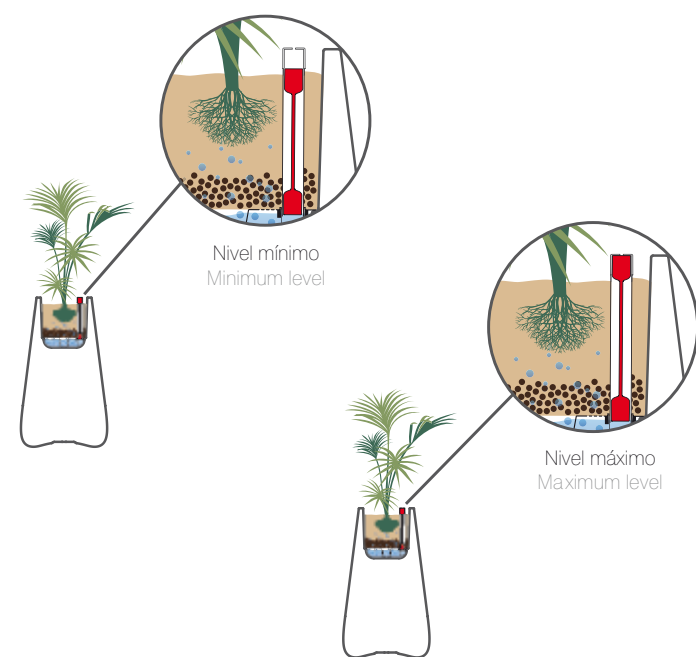

INDOOR (collection LLUM & LED) 

For indoor use, need to check if the stopper of drainage is placed before planting the plant.

OUTDOOR 

For outdoor use, please take off the stopper of drainage (LLUM and LED collection) and drill the holes at the indicated mark, bearing in mind the position of the water tank (AIRE, AIGUA and FOC collections) and also in the base of the flower pot, so that if it rains, the water overflow will evacuate and not harm the plant.

If you cover the soil with a fine layer of KUBIKO, it will stop the moisture from evaporating and improve its aesthetic appearance. For fertilizing and better care of your plants, consult your gardener or your garden centre. VONDOM, accepts no responsibility for any damage done to the plants caused by the incorrect use of flowerpots.

## RECOMENDACIONES

Después de este período de adaptación de las raíces, llene el depósito de la reserva del agua al máximo, muy lentamente hasta que el indicador del agua suba hasta su nivel máximo. Si no hay agua el indicador estará al mínimo. Compruebe periódicamente el nivel del indicador del agua. El período de regado depende según el tamaño de maceta, tipo de planta y de su ubicación. Consúltelo con un profesional del sector.

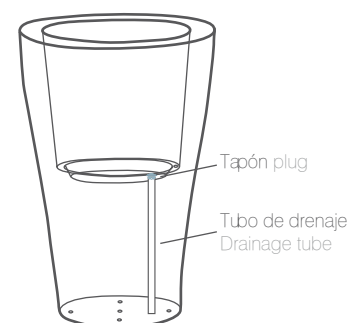

INTERIOR (colección LLUM y LED) 

Para uso interior se tiene que comprobar que el tapón del drenaje esté colocado antes de plantar la planta.

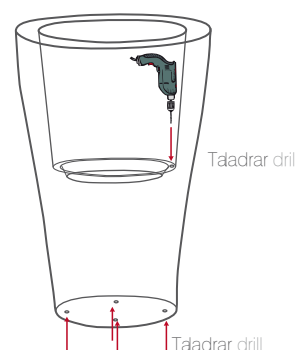

EXTERIOR 

Para uso en el exterior se tiene que sacar el tapón del drenaje (colección LLUM y LED) y taladrar los puntos de precorte respetando la reserva del agua (colección AIRE, AIGUA y FOC) y en la base de la maceta, ya que si llueve el agua sobrante podrá evacuar y no dañará la planta.

Si cubre la tierra con una capa de KUBIKO, evitará que se evapore la humedad y mejorará su aspecto estético. Para el abonado y un mejor cuidado de sus plantas, consulte en su tienda especializada o a un profesional del sector. VONDOM, no se hace responsable de cualquier daño ocurrido en la planta debido a un mal uso de sus macetas.
